A Computer Science engineering student and Full Stack Developer skilled in Java, Spring Boot, Flutter, and React.js, dedicated to engineering scalable, high-impact software solutions.

EDUCATION

Karmaveer Bhaurao Patil College of Engineering, Satara **August 2023 - Present**

Bachelor of Technology in Computer Science Engineering (CGPA: 7.0)

SKILLS

Languages: Java, Python, JavaScript (ES6+), Dart, HTML5, CSS3, SQL

Technologies/Frameworks/Libraries: React.js, Spring Boot, Flutter, Node.js, Hibernate, Spring Data JPA, LangChain4j, Spring AI

Databases: MySQL, Firebase Firestore

Tools & Platforms: Git, GitHub, Docker, Postman, JWT, Firebase, REST APIs, Maven

Concepts: Agentic AI, Prompt Engineering, Agile Development

WORK EXPERIENCE

FREELANCE SOFTWARE DEVELOPER, Satara, Maharashtra **January 2026 - Present**

Full Stack Developer

- Architected and delivered a full-stack e-commerce platform (ThreadVibe) utilizing React.js and Advanced Java, integrating secure JWT authentication and a Razorpay gateway to facilitate seamless online transactions.
- Engineered a cross-platform institutional management mobile app (CodeGurucool) using Flutter and Firebase, deploying real-time data synchronization and automated online fee collection modules.
- Streamlined business operations by translating complex client requirements into production-ready software solutions, prioritizing scalable backend architectures, and optimizing the frontend user experience.

PROJECTS

GetSet: Engineering College Admission System | React.js, Flask, Python, REST APIs

- Developed and deployed a dynamic web-based counseling platform utilizing React.js and Python to recommend optimal engineering colleges based on entrance examination scores and user preferences.
- Engineered robust backend recommendation logic with Flask and integrated seamless REST APIs, resulting in direct, official adoption by the college to assist prospective students during CET admission registration.

RationDaata: Ration Shop Management App | Flutter, Firebase, Firestore

- Built and successfully launched a cross-platform mobile application to automate and streamline inventory management and beneficiary tracking for local businesses.
- Integrated Firebase Authentication and Cloud Firestore for secure, real-time data synchronization, achieving active adoption and daily usage by over 20 ration shop owners.

ChatX: Secure Messaging Application | Flutter, Firebase

- Designed an accessibility-focused messaging utility enabling frictionless, single-time communication by entirely removing the need to share personal phone numbers.
- Architected secure authentication and real-time messaging pipelines using Firebase services, successfully scaling the platform to serve over 100 active users while maintaining strict privacy standards.

ACHIEVEMENTS

- Secured 2nd Place at the State-Level Rayat Avishkar Project Competition.
- Selected as a Cummins Scholar.
- Spearheaded technical initiatives as Technical Secretary for CSESA and served as Organizer Head for the Hacknovate 2K26 National-Level Hackathon and Innovetex 2K26.
