Ghanasham Dalvi

Aspiring Software Engineer

dalvighanasham@gmail.com — +91-9371809960 — LinkedIn — GitHub

Computer Science and Engineering student with hands-on experience in Full Stack and Mobile Application Development using Java, Spring Boot, Flutter and React.js. Experienced in developing REST APIs, secure authentication systems and scalable applications solving real-world problems.

Education

Karmaveer Bhaurao Patil College of Engineering, Satara Aug 2023 – Present
Bachelor of Technology in Computer Science Engineering

Skills

Languages: Java, SQL, JavaScript (ES6+), HTML5, CSS3
Frameworks: Hibernate, React.js, Spring Boot
Databases: MySQL, Cloud Firestore
Tools and Technologies: JDBC, Firebase, Git, GitHub, Maven, Postman, VS Code, Eclipse, IntelliJ
Core: DSA, OOP, DBMS, Design Thinking, CN, OS, REST APIs, Agile,

Technical Projects

ThreadVibe – E-Commerce Website React.js — Java — MySQL
GitHub

- Developed a full-stack custom T-shirt printing platform featuring JWT authentication, Razorpay payment integration and secure order management.
- Implemented shopping cart, wishlist, user profile and product catalog modules using React.js, Java and MySQL.
- Designed secure REST APIs for user authentication, product management and order processing to support seamless user interactions.

GetSet – College Admission Counseling System React.js — Java — MtSQL
GitHub

- Developed an engineering college recommendation platform based on students' CET scores and admission preferences.
- Built a responsive React.js frontend integrated with Java and MySQL recommendation services using REST APIs.
- Successfully adopted during CET admission registration to assist students in making informed college selection decisions.

RationDaata – Ration Shop Management Application Flutter — Firebase
GitHub

- Developed a Flutter-based mobile application for ration shop owners using Firebase Authentication and Cloud Firestore.
- Built inventory, stock distribution and beneficiary management modules currently used by 20+ ration shop owners.
- Designed a multi-tenant Cloud Firestore architecture enabling secure, real-time data management across multiple ration shops.

Work Experience

Codegen Technologies Sep 2025 – Apr 2026
Java Full Stack Development Intern

- Developed and maintained 15+ RESTful APIs using Java, Spring Boot, Hibernate and Spring Data JPA.
- Implemented JWT authentication and Role-Based Access Control (RBAC) for secure multi-user access management.
- Optimized backend services and SQL queries to improve maintainability and application performance.

Positions of Responsibility

- Technical Secretary – CSESA.
- Organizer Head – Innovetex 2K26.
- Organizer Head – Hacknovate 2K26.

Achievements

- Selected as Cummins Scholar.
- State-Level Rayat Avishkar Project Competition – 2nd Place Winner.
- Solved 200+ DSA problems across coding platforms.
- Smart India Hackathon (SIH) Internal Round Winner.
- ScienceExpo Project Competition Winner.
