Professional Summary

Computer Science and Engineering student with hands-on experience in Java, Python, React.js, Flutter, Node.js, Django, MySQL, Firebase, REST APIs, and Git. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, and software development. Experienced in developing full-stack web applications and mobile applications, integrating databases and APIs, and solving programming problems using Java. Seeking an entry-level Software Developer or Software Engineer role through campus placement.

Education

Karmaveer Bhaurao Patil College of Engineering, Satara **2027**
Bachelor of Technology in Computer Science and Engineering **CGPA: 6.5 / 10**

Technical Skills

Programming	Java, Python, C, C++, JavaScript, Dart
Web Technologies	HTML5, CSS3, React.js, Node.js, Express.js, Django, REST APIs
Mobile Development	Flutter, Dart
Databases	MySQL, Firebase, Firestore
Data Structures	Arrays, Strings, Linked Lists, Stacks, Queues, Hashing, HashMap, HashSet, Recursion, Binary Search
Algorithms	Sorting, Searching, Merge Sort, Quick Sort, Binary Search, Lower Bound, Upper Bound
Tools	Git, GitHub, Docker, Postman, VS Code, Android Studio
Core CS	Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

Campus Connectivity App *Flutter, Firebase, Firestore*

- Developed a mobile application for student communication, campus activities, profiles, and information management.
- Implemented Firebase Authentication for secure user registration and login.
- Integrated Cloud Firestore for storing and retrieving student profiles and application data.
- Designed reusable Flutter widgets and application screens for a responsive mobile user experience.

MentorConnect – Student Mentor Management System *React.js, Node.js, Express.js, MySQL, Firebase*

- Developed a full-stack web application connecting students, mentors, and academic administrators.
- Built React.js dashboards for student and mentor management, profile information, activities, and academic data.
- Developed RESTful APIs using Node.js and Express.js for student and application data management.
- Designed MySQL database tables and implemented CRUD operations for managing application records.
- Integrated Firebase Authentication for user authentication and role-based access.

AI-Driven Smart Greywater Recycling System *Flutter, IoT, Firebase*

- Developed an IoT-based system for monitoring and managing greywater recycling operations.
- Built a Flutter dashboard to display real-time sensor data and system status.
- Integrated Firebase for storing and retrieving sensor readings.
- Designed automated monitoring functionality to improve system visibility and data management.

Data Structures & Algorithms

- Practiced Data Structures and Algorithms using Java with focus on problem solving and time-complexity analysis.
- Implemented Arrays, Strings, Linked Lists, Stacks, Queues, HashMap, HashSet, Recursion, and Binary Search.
- Implemented and practiced Merge Sort, Quick Sort, Searching, Lower Bound, and Upper Bound algorithms.
- Solved programming problems involving arrays, strings, searching, sorting, recursion, hashing, and linked lists.

Development Experience

- Developed REST APIs and tested API requests and responses using Postman.
- Used Git and GitHub for source code management and project version control.
- Used Docker fundamentals for application containerization and development environments.
- Worked with MySQL, Firebase Authentication, and Firestore for application data management.

- Developed applications using React.js, Node.js, Express.js, Django, Flutter, and Firebase.

Leadership & Activities

Event Coordinator – Desinity Technical Event

- Coordinated a Figma-to-HTML/CSS development competition at KBP College of Engineering.
- Managed participant coordination, scheduling, and event logistics.
- Collaborated with faculty members and student volunteers to execute the technical event successfully.

Soft Skills

Problem Solving | Communication | Teamwork | Leadership | Time Management | Adaptability
